Kevin Xu

Curious vagabond who found his niche in programming. I got my start with making xanga layouts for Live Journals and Xanga. Now, I build web apps with a passion for functionality. When I'm not coding, I take a deep dive in the art of stenciling. Let's team up and create something beautiful together.

Highlighted Skills

Front End

Javascript, jQuery, Angular JS, SASS, LESS, Gulp, NPM, Bower

Back End

PHP, Ruby, Python, Laravel, Rails, Symfony, Django, Node.js

Database

MySQL, PostgreSQL, MongoDB, Redis, SQL Server

DevOps / Misc

Amazon EC2, RDS, Kinesis, Firehose, Elasticache, Fabric, Linux, Composer

Experience / Projects

Full Stack Engineer
Track Revenue
May 2015 - Nov 2017

- Developed UI utilizing AngularJS and SASS to incorporate a mobile friendly experience to help users track their Ad traffic
- Incorporated multiple ad affiliate APIs to sync their offers with their own Track Revenue account using curl and hourly cron jobs
- Created and maintained over a dozen Redshift/Postgres tables using Amazon Kinesis + Firehose to optimally query statistical information
- Generated and maintained an in-house Machine Learning algorithm as a team to better show ads to users based on contextual data such as country and time of day

Mini App Collection

<https://xukev.in/apps>

- Cataloged a few small apps on my personal website which included:
 - bitcoin price tracker with historical data
 - game of rock paper scissors
 - weather tracker
 - ascii digital clock
 - credit card validator

Education

University of California,
San Diego

B.S in Psychology
Minor in International Studies, Economics

2007 - 2012
